- Provide Images and Or Video of Lawyer(s)
- PNG or JPEG of Law Firm Logo
- Provide Access to Phone Numbers
- Provide Access to Call Tracking Systems
- Provide Access to CRM & Social for Install
- List and Select Languages Needed

HOW SATURN WORKS

Qualify & Disqualify

Saturn uses hard coded objectives as well as conversational artificial intelligence. This allows it to touch on key elements and information that attorneys need to help determine if a potential client has a case or not. Saturn will never provide legal advice, instead it comforts the caller and or chat inquiry that their concerns and questions are being delivered to a law firm team member. This helps with conversions.

Conversion & Tracking

Once the call or chat inquiry is finished, Saturn then sends a written transcript along with a call recording to your law firm via email, SMS text message, as well as via our App. You can call the potential client back directly and or link to your case management system for disclosures and intake forms. We even have our own dashboard and CRM for those who wish to purchase our **Orbit** package.

ADD ON FEATURES

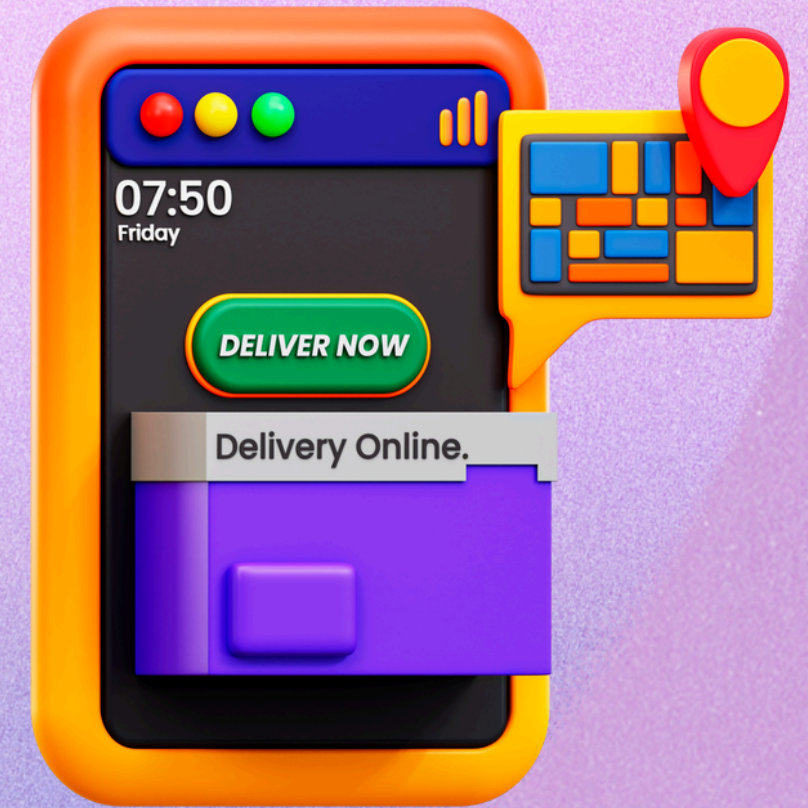

Boost Reviews

Want to improve your reviews, get better results from Google Local Service Ads, and improve your law firms' brand? Cool, ask us about using Saturn to obtain client testimonials and reviews.

Payments & Docs

Saturn can take payments, send our intake forms and disclosures, and store case sensitive docs. We even provide a fully encrypted secure CRM for clients who purchase our Orbit or Custom packages.

Get More Cases

Bottom line, marketing and AI go hand in hand, all in an effort to increase your case load. It's about ROI. And if you're investing money into marketing, you need to CONVERT and TRACK your ads.
